

IFSE WIN QUALITY AWARD FOR MAYER BROWN'S NEW STAFF RESTAURANT

Mayer Brown is a leading global law firm with offices in key business centres across the Americas, Asia and Europe. There are approximately 500 lawyers based in Europe, many of them at the new Bishopsgate offices.

Ifse were originally appointed as Design Consultants on the project. We then tendered for the fit out against three other specialist companies. Ifse were selected and awarded the supply and installation contract because the client felt that we had put forward the best balanced overall offer.

In all, ifse fitted out six catering areas on two floors of the building. This included two full kitchen fit outs with coldrooms and ventilation, a remote dish wash area, servery area, coffee shop, pantry and hospitality area.

When the post contract Quality Audit was carried out, the Principal Contractor presented ifse with a prestigious Quality Award for our work. Key factors in their decision included "Highly detailed and professional service drawings" and "The best catering installation team that the Principal Contractor has ever worked with".

What did ifse do on this Project?

- *Ifse acted as Catering Design Consultants in conjunction with the Design Team, Project Managers and Architects.*
- *Ifse designed and fully detailed the catering fit out for six areas on two floors of the building. This included recommending food safe finishes for the server counters.*
- *Ifse prepared computer generated visuals for all the customer areas.*
- *Ifse specified, supplied and installed all equipment.*
- *This is a substantial project, so ifse arranged "chef to chef" training for the catering team on each area.*
